Table 1 The results of memory study in cases and controls

	mean	SD
cases	79	+/-13.2
controls	82.5	+/- 22.9

3- In attention there is difference between cases and controls but it is   not significantby subjective evaluation by the protocol table 2 (p value =.971)

Table 2 The results of attention study in cases and controls

	mean	SD
cases	77	+/- 12.8
controls	85	+/- 23.9

.

Table 3 Comparison between cases   **and control in attention and memory by standfordBinet (objective)**

.

variable	cases	controls	P value
attention	2.27±1.08	2.00±0.94	0.496 (NS)
Short term memory	105.68±22.17	114.70±18	0.26(NS)

Table   attention score

score	Percent of right answers
1	25%
2	50%
3	75%
4	100 %
