

Table 1 show comparison of SLEQOL score in mild and moderate to severe disease activity groups of patients

Group	Mean±SD	<i>P value</i>
Mild disease activity	83.167±24.347	0.006
Moderate to severe disease activity	107.625 ±28.362	

Table 2. Correlation of SF-36 and SLEQOL to age of the patients

Age of the patients	SLEQOL	SF36
r	0.139	-0.265
P	0.393	0.099
