

Fig 1. base of skull. arrow between greater palatine foramen and incisive foramen
A) Site: 47% opposite 3rd molar. 27% opposite 2nd molar. 26% between 2nd and 3rd molars (figure 2).

Figure (2): Site of greater palatine foramen (white arrow) (A): Opposite 2nd molar
 (B) opposite 3rd molar (C) between 2nd and 3rd molars (red arrows).
B) Distance from incisive foramen: on the right side it varied between 30.01 to 40.94 mm. On the left side it varied between 32.1 to 41.4 mm (Table 1).

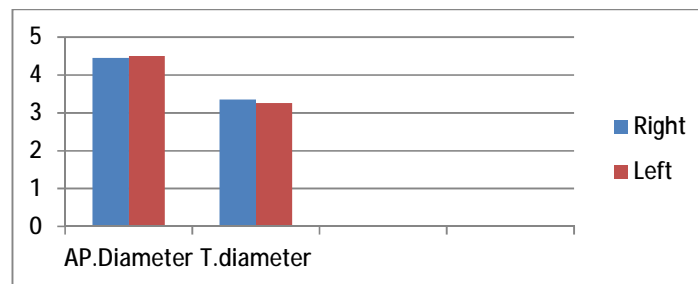

Figure (3): Mean AP and T diameter of greater palatine foramen in 100 adult skulls.
