

Table 1 shows the difference between the Preoperative BCVA and posoperative UCVA after 1 month and the efficacy index is calculated.

<u>Preop BCVA</u>	0.434 + 0.165
<u>Postop UCVA at 1 month</u>	0.429+ 0.155
<u>P value</u>	0.846
<i>Efficacy index = $\frac{\text{Postop UCVA}}{\text{preop BCVA}}$</i>	<u>98.8%</u>

UCVA= uncorrected visual acuity, BCVA= Best corrected visual acuity
